

WAGNER'S NEW MONSTER DEFINES HEAVY PLATE ROLLING WITH CAPACITIES OVER 10" HOT AND 6" COLD.

Introducing Wagner's new MONSTER Sertom plate rolling system, with unique variable geometry plate rolling technology and sizable advantages:

- Heavy Wall Tight Diameters
- Capable of Rolling Heavy Wall Cones
- State of the Art Technology
- Exacting Tolerances to Customers Specifications

Wagner is your complete solution in formed products with: *ASME Code welding. Skilled, experienced operators. Industry standard-setting quality and performance. A full complement of other rolls and presses. And now, the new Wagner MONSTER – the largest rolling system in America.*

Wagner is the premier choice for:

- Oil & Gas
- Power
- Chemical
- Food
- Structural
- Bridge
- Offshore
- Energy

WE HAVE THE **LARGEST** AND MOST COMPLETE LINE OF HEAVY PLATE ROLLING AND FORMING EQUIPMENT IN AMERICA.

With facilities in Oklahoma, Texas and California, Wagner offers enormous capacities – in equipment and experienced people – to precisely and cost-effectively produce even the largest custom projects to your exact size-shape specifications, expectations, and total satisfaction.

ASME Code Welding – exceeds requirements, sets standards, independently tested.

PLATE ROLLING

- Thickness over 10"
- Diameters over 200" + ID
- Single cylinder lengths 15'0"
- Cold & hot form cylinders
- Tight roundness tolerances

BURNING

- Oxy fuel
- Plasma arc

PLATE BENDING

- 10 press brakes
- 100 – 2000 tons
- Custom dies design

WELDING

- ASME Code Certified
- Carbon steel
- Chrome-moly steel
- Stainless steel
- Submerged arc welding
- Single or dual wire

PRESSURE VESSELS

- ASME Certified
- Section VIII
- S, U, stamps

SHEARING

- Up to ½" thickness
- Up to 12' lengths
